

# SOLVAY SODA ASH JOINT VENTURE

December 12, 1997

Bernie Dailey  
WDEQ-Air Quality Division  
122 West 25<sup>th</sup> Ave.  
Cheyenne, WY 82002

Dear Bernie:

SUBJECT: AQD #2A VELOCITY

Per our conversation earlier this week, the velocity of the Crusher Baghouse, AQD #2A was incorrectly stated in Table 1-1 of my November 5<sup>th</sup> correspondence to you. This velocity of 15.85 m/s was also used in the air dispersion model associated with AP-W77. The correct velocity is 18.3 m/s (60 ft/sec). As we discussed, this higher velocity would have a favorable impact on the ambient analysis. Therefore, the air dispersion model will not be rerun at this time.

As you are aware, the timing of the issuance of the expansion permit has become critical to the project. If I can be of any assistance to your office in expediting the process, do not hesitate to contact me at (307) 872-6571.

Sincerely,

Dolly A. Potter  
Environmental Engineer
